2022 ROTARY DRILLING RIG

- Max. drilling diameter 1.3m
- Max. drilling depth 45m
- Rated output torque 130kN·m
- Engine power 133kW/2000rpm

LEAPFROG CHALLENGE , FLEXIBLE TRANSFER

SR125 is suitable for pile construction in small towns, foundation piles of low-rise building, slope protection pile of high-rise building and power pile construction. The minimum pile diameter is only Φ450mm, small and flexible, and can work in a narrow space.

High efficiency: the whole machine is design-optimized, low pressure loss, fast speed and easy to operate; equipped with multi-gear rotary drive, automatic soil dumping function, automatic soil shaking function, ensure high drilling efficiency.

Economy and fuel saving: powerful, reliable and durable, low fuel consumption and low operating cost.

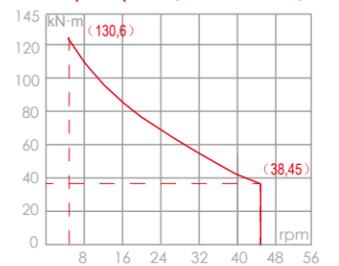

Easy to transport: the Kelly bar can be transported with the base machine. Transport dimensions do not exceed the limit, saving cost. With large walking traction, it is suitable for field construction and rural town roads. The minimum crawler width is only 2550mm, it can easily pass a narrow space.

Safe and comfortable: 10-inch HD touch screen, fast response time and more convenient for operation. With a smartphone APP EVI, it can realize remote real-time monitoring, one-click service call and group management.

Convenient maintenance: reasonable layout, comfortable operation; air suspension seat has good vibration reduction effect, avoid fatigue; air conditioner with high power, fearless of severe cold and heat; enhanced top guardrail and extreme weather warning provide double protection.

Convenient maintenance: engine and hydraulic system set on the side position to have a large maintenance space; integrated electric control cabinet realizes modular management and control; fault self-diagnosis technology facilitates maintenance and service.
